March 27-28: Pipeline Safety Workshops on Leak Detection & Remote Controlled Valves *Open to Public-- Watch Live Webcast or Attend*

WASHINGTON, DC - DOT's Pipeline and Hazardous Materials Safety Administration (PHMSA) will hold workshops about expanding the use of pipeline leak detection systems and enhancing the effectiveness of automatic and remote controlled valves on the nation's natural gas and hazardous liquid pipelines. Registration is free, and both workshops are open to the public. Agenda, registration information, and more details are available on PHMSA's website at: <http://primis.phmsa.dot.gov/meetings/>.

WHAT: Workshop I: Improving Leak Detection System Effectiveness Workshop
Tuesday, March 27, 8 a.m. to 5 pm. EDT

Workshop II: Understanding the Application of Automatic Control & Remote Control Valves
Wednesday, March 28, 8 a.m. to 3 p.m. EDT

LIVE WEBCAST: <http://primis.phmsa.dot.gov/meetings/>

WHERE: The Hilton Washington/Rockville Hotel and Executive Conference Center
1750 Rockville Pike
Rockville, MD 20852

PARTICIPATE: Submit questions and comments via the [webcast](#).

PHMSA's mission is to oversee the safe transportation of hazardous liquids and natural gas through the network of 2.5 million miles of pipelines, serving over 69 million residential and commercial customers. These pipelines transport and supply more than two-thirds of the fuel used to heat, cool, and operate American homes, cars and businesses. Go [here](#) for more information about each state's pipeline profile.
